Day	Topics
Day-1	Java : Classes and Object , Inheritance , Polymorphism , Overriding , Abstraction , Interface , Encapsulation , Data Binding , Message Passing (Getter and Setter)
Day-2	Databse : DDL and DML Commands , SQL Joins , Aggregate Functions , Group By , Between , Order By , Having , Like
Day-3	Java Database Connectivity : Driver Class , Connection , Prepared Statement , Statement , Result Set
Day-4	Design Pattern (MVC) , J2EE Container , Install Tomcat / Glass Fish Server , Servlet Architecture , Servlet config
Day-5	Handling Request and Response , Servlet with JDBC Connection , Servlet Session , Servlet Filter
Day-6	JPA Introduction , Hibernate Overview , ORM with Hibernate both XML and Annotation
Day-7	Entity Mapping , Primary key , Join column , Nullable , Unique , Inheritance Mapping , Component Mapping
Day-8	Collection Mapping , One to One , Many to One , One To Many , Many to Many Relationships
Day-9	HQL , HCQL , HPQL , get () , load( ), Eager / Lazy Loading , Pagination
Day-10	Validation using Validator , CRUD Operations , Native SQL , Batch Processing , Interceptors
Day-11	Spring Introduction : Dependency Injection (Setter and Constructor Injection) , Autowired
Day-12	Spring Boot : Introduction , Installation , Set up Spring Boot App , Application properties
Day-13	Spring Boot : REST API's , Controllers , Services , Models , Repositories

Day-14	Spring Boot : POST MAN Introduction , POST MAN Testing , @Request Body , @Path Variable
Day-15	Spring Boot CRUD Operation : Spring Boot with MySQL Setup , Spring Data JPA , Hibernate Integration
Day-16	Spring Boot CRUD (II) : Multiple Entities , Pagination , Sorting , JPQL
Day-17	Spring Boot Exception Handling , Swagger
Day-18	Spring Security : CORS , CSRF , Bcrypt Password Encoder
Day-19	JWT : Introduction about JWT , JWT Setup , JWT Token Generation
Day-20	JWT Token Validations , Role Based Authentication , Security with database users
Day-21	Introduction to Web Application , Why web application , HTML Introduction , HTML Tags : P , Font , Heading , Styles , Formatting , Colors
Day-22	HTML : Links , Images , Favicon , Page Title , Tables , List , Block and Inline , Div , Classes , Id , Buttons , Iframes , File Paths , Adding Java Script , Head , Layout
Day-23	HTML Forms : Forms , Attributes , Input Types , Input Attributes , Form Attributes
Day-24	CSS : Introduction , Selectors , Colos , Background , Text , Font , Borders , Margins
Day-25	CSS : Padding , Height / Width , Boxmodel , Links , Lists , Tables
Day-26	CSS : Display (Flex) , Position , Navigation Bar , Drop Downs
Day-27	Java Script : Syntax , Variables (Let , Const , Var) , Operators , Conditions , Loops , Arrow Functions , Function Parameter , Function Returns

Day-28	Java Script : Arrays , Array Methods , String , String methods
Day-29	Java Script : Objects , Object Methods , Window , Window Methods
Day-30	Java Script : Classes and Objects , Access Modifiers , Constructor Method
Day-31	Java Script : Asynchronous JS , Callbacks , Promises , Event Loop , Async and Await
Day-32	Java Script DOM : Select DOM Elements , Custom Events , addEventListener( )
Day-33	Java Script : Closure , Hoisting , Higher Order Function , Debugging in JS
Day-34	React JS : Fundamentals , Components , Props , JSX , State , Functional Components (useState , useEffect)
Day-35	React JS : Routing , Router Setup , Route Configuration , Route Parameters , Navigations , Redirects
Day-36	React JS : Services & Asynchronous Data handling , Fetching data using AXIOS / Fetch API
Day-37	React JS : Managing Side effects with useEffect, Handling promises and Async/Await
Day-38	React JS : CRUD (Create , Read , Update , Delete Operations via Service methods using backend API
Day-39	React JS : JSON Server setup , db.JSON , Form Handling , React Hook Forms with validations
Day-40	React JS : Component Communication (Props Drilling , Context API , Route Parameters) , Deploy Front end Using Vercel
